<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Installation</b>	<b>1</b>
<b>3</b>	<b>Bug Reporting</b>	<b>1</b>

## 1 Introduction

The software, Snow Optics Toolbox, discussed in this document was created to allow for the analysis of images for the study of snow optical properties. The information contained in this document is meant to serve two purposes:

1. to provide a user manual for operating the software package from within MATLAB and
2. to provide sufficient details for researchers to maintain and modify the software.

## 2 Installation

The Snow Optics toolbox is under development...more to come soon.

## 3 Bug Reporting

The Snow Optics Toolbox is under development, as such problems and bugs are expected. Issues may be reported using the Snow Optics Toolbox [github](https://github.com/aeslaughter/optics)<sup>1</sup> site, please explain the problem in detail. This interface may also be used to make feature suggestions.
